Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 14, 2004 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 41 – 47 and 49 – 52 are rejected under 35 U.S.C. 102(e) as being anticipated by Takamitsu et al. (CA 2,096,672)

With reference to claim 41, Takamitsu et al. (hereinafter "Takamitsu") discloses a personal care absorbent article comprising a front portion including opposing first and second lateral side portions defining respective first and second lateral side edges (figure 1), and a central section defining a fastening area between the first and second

Art Unit: 3761

lateral side portion (16), first and second fault lines (9b) being disposed between the fastening area and the respective first and second lateral side portions (figure 1), a rear portion including an outer rear edge (figure 2), the first and second fault lines being configured for activation to selectively release the front portion from the rear portion for use of the personal care absorbent article as a diaper-like article (page 3A); a crotch portion extending between the front portion and the rear portion (figure 6); first and second fasteners releasably secured to the fastening area (page 8, line 24 to page 9, line 7) and non-releasably secured to the first and second lateral side portions of the front portion (page 3), the first and second fasteners being adjustable in the fastening area without activation of the first and second fault lines as set forth on page 9, line 17 to page 10, line 2.

As to claim 42, Takamitsu discloses a personal care article wherein the fault lines are cut lines having no front portion material extending across the fault lines as set forth in figure 5.

With reference to claims 43 and 50 – 52, Takamitsu discloses the fault lines as lines of perforations, which may be considered as an array of apertures, material crushed in a line pattern or material that is breakably attached, as set forth on page 5, line 20.

With respect to claim 44, Takamitsu discloses the fasteners comprising hook-type fasteners engageable with loop material at the fastening area as set forth on pages 8, line 24 to page 9, line 7.

Art Unit: 3761

Regarding claim 45, Takamitsu discloses the first and second fasteners providing at least partial support of integrity of the front portion across the fault lines as set forth in figure 1.

With reference to claim 46, Takamitsu discloses a fastening area that comprises a separate and distinct patch of fastening material affixed to an underlying web as set forth on page 9, lines 13 – 16.

As to claim 47, Takamitsu discloses a fastening area that is integral with a front surface of the central section of the front portion as set forth in figure 4.

As to claim 49, see figure 5.
